ABSTRACTS AND CURRENT PAPERS JOURNALS

Three main subject areas are covered by INSPEC abstracts and current papers journals: physics, electrical and electronics engineering, and computer and control engineering. For each field an abstracts journal and a companion titles journal are published. The abstracts journals are intended as library tools for retrospective information retrieval, whereas the companion titles journals, which omit the abstracts and associated indexes, are intended as low-cost current-awareness tools for the individual.

CUMULATIVE INDEXES

Cumulative indexes are available for *Physics Abstracts*, *Electrical & Electronics Abstracts*, and *Computer & Control Abstracts*, for both authors and subjects. These cumulations generally cover a period of four years, with the exception of *Computer & Control Abstracts* where the initial volume covered the period 1966–68. The table below shows the prices and periods for the two types of cumulative index.

	Physics Abstracts		Electrical & Electronics Abstracts		Computer & Control Abstracts	
	Subject	Author	Subject	Author	Subject	Author
1955–59	£20	£20	£15	£20	—	—
1960–64	£40	£17	£20	£12	—	—
1965–68	£60	—	£35	£20	—	—
1966–68	—	—	—	—	£15 (combined)

AMERICAN SUBSCRIPTIONS

Physics Abstracts
Current Papers in Physics

For AIP members, wherever they reside, and from the public in the Americas, to the Subscription Department, American Institute of Physics, 335 East 45th Street, New York, NY 10017, USA. Please allow six weeks' notice for change of address, send both old and new addresses and include an address label from a recent issue.

Electrical & Electronics Abstracts
Computer & Control Abstracts and associated current papers journals in these fields

For IEEE members wherever they reside, and from the public in the Americas, to the Fulfillment Manager, Institute of Electrical & Electronics Engineers Inc., 345 East 47th Street, New York, NY 10017, USA.

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.) This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC database. Information is dispatched weekly on 150 mm × 100 mm (6″ × 4″) cards.

TOPICS

This is an SDI service based on standard profiles. There are 72 subjects covering high-activity areas of research and development. This is an inexpensive card service designed to alert engineers and researchers to the availability of literature within their subject area.

MAGNETIC TAPES

These are produced, containing all the information included in the INSPEC publications. They enable the larger research and development organisations to produce their own internal information and current-awareness services.

For more details of any of these services please write to:

New Cumulative Indexes 1969–1972

This offer can be worth up to £48/$120 to you and bring you the most comprehensive information-retrieval tool in the English-language in the fields of Physics, Electrical & Electronics Engineering, Computers & Control. For it entitles you to obtain the new four-year Cumulative Author and Subject Indexes to *Science Abstracts* at special prepublication prices.

Prices range from £30 ($78) to £222 ($545). But you can, between now and the 31st December 1973, order any of these Indexes at the special prepublication prices.

Deliveries will start in January 1974 and will be completed for all issues by March 1974.
